## EXPERIENCE

### General Assembly, Chicago, IL — Software Engineer

MARCH 2019 - JUNE 2019

Built Several full-stack web applications individually and as part of a team with CRUD operations and RESTful routings.

Back end knowledge with Node.js and Spring Boot. Front end apps built with react or EJS.

## PROJECTS

### Allo — React, Express, MongoDB, IBM Watson LT API

Allo is an instant translation messaging app, built for users to have all received messages translated to their preferred language.

Real-time messaging was added using socket.io to have open communication between the clients and the server.

### Art in the Wild — Node.js, React, Chicago Data Portal API

Built a Node web application utilizing Chicago's own Data API that pulls information about each mural around the city.

Users have a map to find the posted murals and can upload pictures they take of murals to the website.

### Greg's List — EJS, Bcrypt, Nodemailer, Mongoose

Collaborated to develop a coders CriagsList, where users can sign up to create job postings, events, and upload their own résumé.

Users can get in contact with other users by sending an email through the website.

### Hike On — Java, Spring Boot, MySQL, Maven

Teamed up remotely to rebuild the back end of a pre-existing API. The back end was converted from JavaScript and a nonrelational database to Java and a sequential Db.

## SKILLS

### Front End

HTML5, CSS3, JavaScript, React, jQuery, Bootstrap

### Back End

Node.js, Express, MongoDB, MySQL, Java, Spring boot, Maven

### Test and Development

Mocha, Chai, Heroku, Postman

### Version Control

Git, GitHub

## EDUCATION

### General Assembly - 2019

Software Engineering  
Immersive

### Malcolm X CC - 2018

Applied Science

### Macomb CC - 2017

CNC Training

## ADDITIONAL EXPERIENCE

### Sharp Tooling Solution-2017

programmed and operated two CNC machines using WorkNC
