EXPERIENCE

General Assembly, Chicago, IL — Software Engineer

MARCH 2019 - JUNE 2019

Constructed Several full-stack web applications individually and by coordinating with multiple colleagues. Each app built had full CRUD operations and RESTful routes.

PROJECTS

Allo — React, Express, MongoDB, IBM Watson LT API

Allo is an instant translation messaging app. All received messages can be translated to the user's preferred language.

Real-time messaging occurs through socket.io, which produces open communication between the clients and the server.

Art in the Wild — Node.js, React, Chicago Data Portal API

Art in the Wild was built on the Node.js framework utilizing Chicago's own Data API, mural registry. The API pulls information about each mural from around Chicago.

Users have a map to find the posted murals and can upload pictures they take of the murals to the website.

Hike On — Java, Spring Boot, MySQL, Maven

Teamed up remotely to rebuild the back end of a pre-existing API. We converted the back end from JavaScript and a nonrelational database to Java and a sequential DB.

Using MySQL we added a second table to give users the ability to save information to their account.

Greg's List — EJS, Bcrypt, Nodemailer, Mongoose

Collaborated to develop a job oriented CriagsList. This full-stack application was developed to let users sign up to create job postings, events, and upload their own résumé.

SKILLS

Front End

HTML5, CSS3, JavaScript, React, jQuery, Bootstrap

Back End

Node.js, Express, MongoDB, MySQL, Java, Spring boot, Maven

Test and Development

Mocha, Chai, Heroku, Postman

Version Control

Git, GitHub

EDUCATION

General Assembly - 2019

Software Engineering
Immersive

Malcolm X CC - 2018

Applied Science

Macomb CC - 2017

CNC(Computer Numerical Control) Training

ADDITIONAL EXPERIENCE

Sharp Tooling Solution-2017

programmed and operated two CNC machines using WorkNC
