EXPERIENCE

General Assembly, Chicago, IL — *Software Engineer*

MARCH 2019 - JUNE 2019

Built Several full stack web applications individually and in a team CRUD operations and RESTful routings.

Back end knowledge with node.js and spring boot. Front end built with react if decoupled or ejs.

PROJECTS

Allo — *React, Node.js Express, MongoDB*

Allo is an instant translation messaging app, built for users to have all messages translated to their preferred language.

Real-time messaging was added using socket.io to have full communication between the client and the server.

Art in the Wild — *React, Node.js, Chicago Data Portal API*

Built a Node web application utilizing Chicago's own Data API that pulls information about each mural around the city.

Users have a map to find the posted murals and can upload pictures they take to the website.

Greg's List — *EJS, Bcrypt, Nodemailer, Mongoose*

Collaborated to develop a coders CriagsList, where users can sign up to create job postings, events, or load their own résumé.

Users can get in contact with other users by sending an email without having to leave Greg's list's website.

Users also have the option to RSVP to events and get a list of everyone that is attending.

SKILLS

Front End

HTML5, CSS3, JavaScript, React, jQuery, Bootstrap

Back End

Node.js, Express, MongoDB, MySQL, Java, Spring boot, Maven

Test and Development

Mocha, Chai, Heroku, Postman
