EXPERIENCE

General Assembly, Chicago, IL — *Software Engineer*

MARCH 2019 - JUNE 2019

Constructed four full-stack web applications both independently and two by collaborating with colleagues. Each app was built using full CRUD operations and RESTful routes. Gained knowledge about relevant industry technology and computer science theory through the +700 hour immersion.

PROJECTS

Allo — *React, Express, MongoDB, IBM Watson LT API*

Allo is an instant translation messaging application that receives and immediately translates messages to the user's preferred language. Real-time messaging occurs through socket.io, which produces an open communication between the clients and the server.

Art in the Wild — *Node.js, React, Chicago Data Portal API*

Art in the Wild was built on the Node.js framework utilizing Chicago's Data API, mural registry. The API pulls coordinates and information about each mural throughout Chicago. With this JSON data the application displays a map letting users explore the city and upload their mural photos to Art in the Wild.

Hike On — Java, *Spring Boot, MySQL, Maven*

Teamed up remotely with colleagues to rebuild a web application converting the pre existing API from JavaScript and MongoDB to Java and MySQL, we expanded user functionality by including additional tables to the database and updated the front end to reflect this change.

Gregslist — *EJS, Bcrypt, Nodemailer, Mongoose*

Paired programming initiative to develop a job oriented "craigslist". This full-stack application is meant for users to create job postings, events, and upload their own résumé and users can RSVP to events and connect with others through email without leaving the website.

SKILLS

Front End
HTML5, CSS3, JavaScript, React, jQuery, Bootstrap

Back End
Node.js, Express, MongoDB, MySQL, Java, Spring Boot, Maven

Test and Development
Mocha, Chai, Heroku, Postman

Version Control
Git, GitHub

EDUCATION

General Assembly - 2019
Software Engineering Immersive

Malcolm X CC - 2018
Applied Science

Macomb CC - 2017
CNC(Computer Numerical Control) Training

ADDITIONAL EXPERIENCE

HaiSous Kitchen - 2018
Brunch service floor leader, delegated positions and tasks to my team members

Sharp Tooling Solution-2017
programmed and operated CNC machines using WorkNC
